DevOps: Docker

Experience

Mentem Technologies Pvt Ltd

Mid-level Developer

Apr 2023 – Present

Jodhpur, Rajasthan

- As a Mid-Level Developer, I take on more complex tasks and projects, working independently and efficiently to develop and maintain robust web applications. I collaborate closely with team members to implement features, optimize performance, and ensure code quality. My experience allows me to mentor junior developers and contribute significantly to the success of our projects.

Mentem Technologies Pvt Ltd

Junior Web Developer

May 2022 – Mar 2023

Jodhpur, Rajasthan

- Worked on several web applications using HTML, CSS, JavaScript, React and Node ensuring they met client specifications and industry standards.
- Communicated progress and updates with clients, gathering feedback and making adjustments as necessary.
- Ensured websites were mobile friendly and compatible with various by implementing responsive design principles.
- Identified and fixed bugs reported by users and QA team, reducing error rates and improving overall application stability.

Projects

Vip Attraction | *React, Redux-Toolkit , Formik , TailwindCSS*  [Live Link](#)

Apr 2023 -June 2024

- VIP Attractions is a world-renowned multi-award winning Airport Concierge and Lounge Service company operating lounges in Jamaica's two international airports.
- Developed a dynamic and responsive user interface using React and TailwindCSS, ensuring smooth navigation across devices.
- Managed state efficiently using Redux-Toolkit to streamline data handling and improve performance.
- Integrated Formik for robust form handling, enhancing user experience with smooth form validations and submissions.
- Implemented API integration for real-time updates of lounge services, ensuring seamless communication with backend systems.

iClock (Admin Panel) | *Next js, Typescript, Node js, Express js and Tailwind*

Nov 2023 - Dec 2023

- This Project enhances security by acting as a secure intermediary between desktop applications and the database, mitigating direct access risks.
- Designed and implemented a secure API using Node.js and Express.js to act as a middleware between desktop applications and the database.
- Leveraged TypeScript for type safety, ensuring robust and maintainable code, reducing runtime errors.
- Utilized Next.js for server-side rendering, enhancing performance and improving user experience on the admin panel.
- Implemented authentication and authorization mechanisms to protect sensitive data and ensure role-based access control.

Sim Card (Admin Panel) | *Php, Bootstrap*

Jan 2023 - Mar 2023

- Developed a user-friendly admin panel using PHP and Bootstrap, allowing administrators to manage SIM card sales and services efficiently.
- Built a responsive design with Bootstrap, ensuring that the platform was accessible on various devices for both administrators and users.
- Implemented real-time updates for SIM card inventory and activation status, improving service delivery speed and accuracy.
